Hyaluron Gold Serum
24K GOLD BIORESONANCE SKINCARE

TANJA GUTMANN

GOLD FOR THE SKIN

Gold – the precious metal, which was discovered in Egypt 4,000 years before our time, is one of the rarest elements on Earth. Gold stands for eternal values and protection against decay – values that we associate with beauty and purity. Gold is thus still the epitome of that which is highest and noblest. Gold has been used for healing and beauty treatments since ancient times. The Japanese have used gold for skin regeneration for millennia. The skin beauty culture of geishas is characterised by the effect of gold and the Chinese have been using golden needles in acupuncture for millennia.

Even today, gold is valued in cosmetics because of its amazing properties.

MOISTURE

Gold is famous for its moisturising effect, because it is able to retain 300 times its own weight in moisture. Due to the high moisture content of the skin, it creates a cooling and firming effect.

PURIFICATION

Pure gold on the skin also has anti-inflammatory effects. It promotes the supply of nutrients to bodily cells, purifies and detoxifies. Even Paracelsus is said to have appreciated it for its antibacterial and anti-inflammatory properties. Gold is therefore a secret recipe against impure skin.

ANTI-AGING

Skin appears younger when pure gold is applied and the epidermis becomes smooth and even, and anti-aging research discovered this precious metal for itself. It promotes the exchange of oxygen between the skin and delighted researchers with its cell renewal function, which predestines gold as an active ingredient for skin applications.

ENJOY THE BENEFITS OF THE HYALURON GOLD SERUM

- The serum contains pure 24-carat gold.
- Absorption capacity (uptake) is significantly increased due to bioresonance optimisation.
- Gold is an ideal moisturiser for the skin as it can hold up to 300 times its own weight in water and thus convey it to the skin.
- Gold is considered to be highly antibacterial and is used as a secret recipe for blemishes.
- Gold acts as a cell voltage balancer and promotes the meridian qi run (view of the Asian regeneration philosophy).
- Gold dissolves blockages and increases conductivity in the cells (electron flow). This property supposedly allows gold to dejam and energise scars. Pure fine gold has the same voltage as skin cells.
- Gold visibly increases tonicity and elasticity, creating smooth, firm and radiant skin.
- Gold inhibits the loss of elastin and collagen and counteracts premature skin ageing.
- The unique formula, with many valuable ingredients, harmonises the facial reflex zones, is balanced in yin-yang, and was activated by the latest bioresonance technology.

GOLD IN THE FINEST RECIPE

The i-like Bioresonance Hyaluron Gold Serum stands out with its wonderful properties in combination with pure 24-carat gold and an ingenious regenerating and skin-tightening formula.

HYALURON

The combination of long- and short-chain, vegan hyaluronum moisturises and stimulates the fibroblasts (allows the formation of collagen).

COENZYME Q10

Coenzyme Q10 is a key component in the skin's regenerative process. It promotes cell activity, preventing ageing of the skin.

SWISS ALPINE ROSE

The stem cells of the Swiss alpine rose promote vitality of the epidermis and skin stem cells.

EDELWEISS

The Swiss edelweiss is highly antioxidant, works against free radicals and provides vitamins A, C and E.

BAMBOO

The bamboo in the serum provides the necessary silicon, which is ideal for cell regeneration.

POMEGRANATE

Dermatologists consider pomegranate extract an ideal skin regenerator and helps fight impurities and micro-injuries.

HYALURON GOLD SERUM

The pure gold contained in the i-like Bioresonance Hyaluron Gold Serum can best take effect in combination with the balanced formula according to the Asian regeneration philosophy.

Pure, 24-carat gold means that the effect never fails. This activates the qi – the life energy of the body. Fine gold ideally regenerates the cell tension in the skin. Fine gold can thus unblock areas receiving deficient energy supplies and, if necessary, rebuild cell energy.

24-carat gold has high bioelectrolytic conductivity. This is important, because only then can valuable substances penetrate into the skin cells and take effect.

The gloss of the finest microparticles of gold give the skin an unmistakable radiance, making wrinkles and lines disappear. Pure gold!

The Hyaluron Gold Serum by i-like, with its refined ingredients, nourishes your skin in a particularly luxurious way. Radiate “gold” and enjoy the effect of the serum.
